(54) Title of Invention
MOBILE PHONE CAPABLE OF MOUNTING

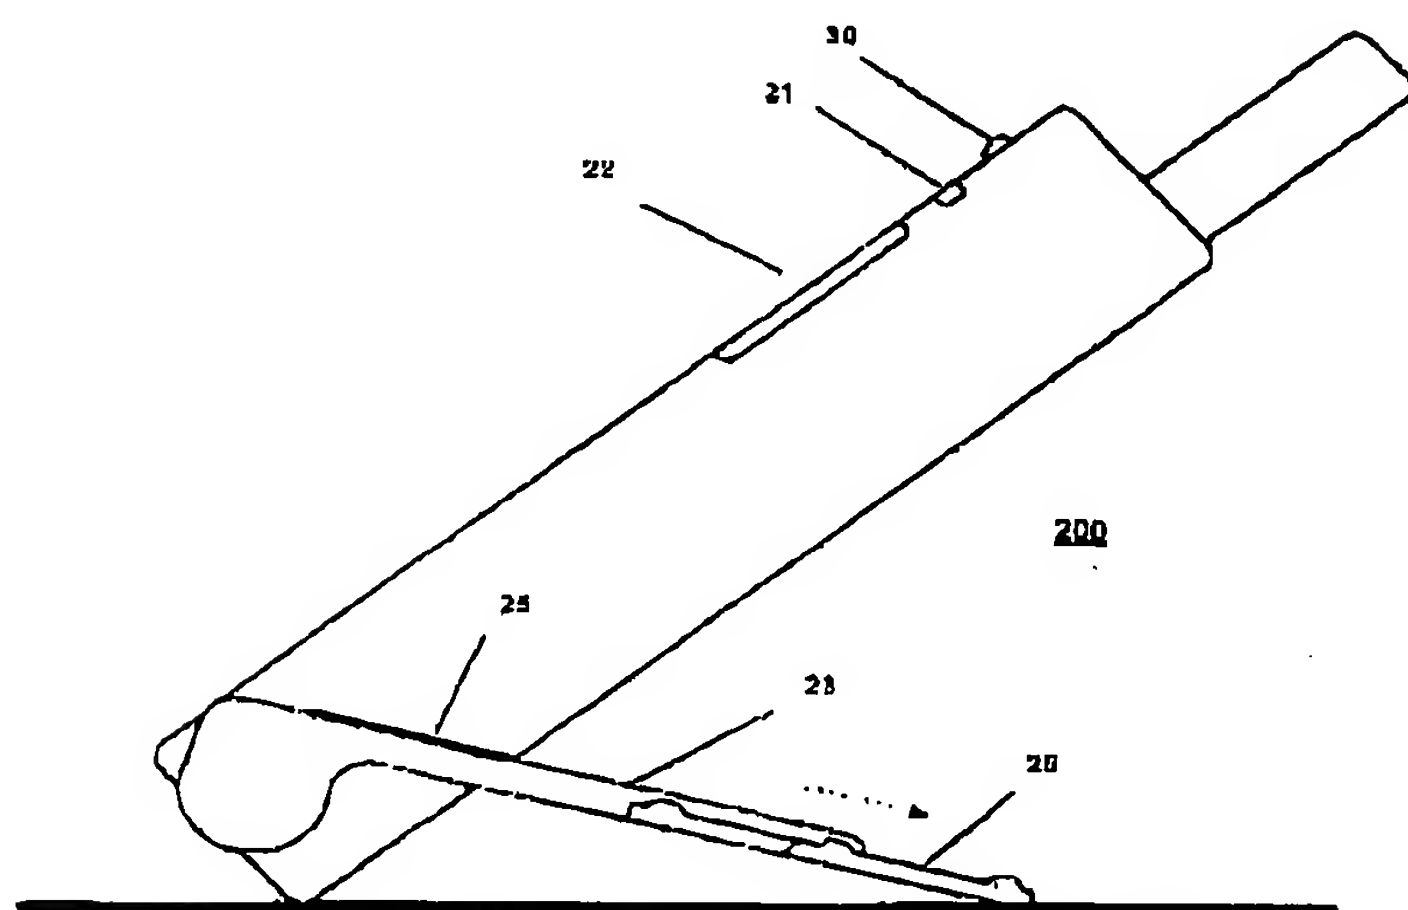

Representative drawing

(57) Abstract:

PURPOSE: A mobile phone capable of mounting is provided to mount the mobile phone such as a moving picture transmitting and receiving mobile phone in which a small camera is installed on a table in a stable state.

CONSTITUTION: A flip(23) is rotated over at least 270 degrees and is opened and closed, and is fixedly supported by a bridging jaw formed at a certain slope in a lower side of a mobile phone (200), and mounts the mobile phone(200) on the ground. The flip(23) is rotated at least 270 degrees to 315 degrees. An maximum rotation angle rotated by the flip(23) is determined by the slope of the bridging jaw. The flip(23) includes a mounting auxiliary board(26) for expanding an entire length.
